

## Who is ECO

ECO Certificazioni is Notified Body n° 0714 and Sincert accredited Certification Institute n° 067A. ECO binds innovation and enviable experience, proven methods and excellent professionals in each sector of competence:

- Certification
- Inspection
- Trainin
- Laboratory tests

Our flexible yet structured organization, wide-spread on the territory, is capable of intervening with timeliness and continuity, creating constructive and close contacts with companies.

A bond which stretches further single controls or certifications, becoming a constant contribution to maintaining the levels of quality achieved.

Those who choose ECO's services for its flexibility and ability to adapt to different situations, certainly do not renounce to a higher level of statement and coordination typical of a major company. ECO has gained substantial experience with great International and National clients.

ECO's mission is to link innovation to a general improvement of the chain of production: this means responding to clients' needs.

Today, living the certification as a necessity to remain on the market is limited.

In fact it will become more and more of a great occasion for a firm, a turn allowing to conform methods and outsets to an ever-changing scenery.

A precious instrument when oriented to growth, challenge and achievement of a personality of one's own on the market.
