

Presence over the territory

A distinct feature of ECO Certificazioni is its diffusion over the National territory.

The uniqueness of ECO Certificazioni lies the very fact we are present and operative all over the territory.

In a reality like our own, a wide-spread presence translates into immediate advantages for client firms, as well as a long-term benefit. Proximity not only means timely interventions, but also a contiguity with clients' issues, which end up determining sharing of intents, aims and experience between ECO and our clients.

An in-depth knowledge of local realities is a strong characteristic of ECO.
